

WIND LOAD CERTIFICATION
For a Sign Along an Interstate, Primary Highway, or Rural Road
Regulated under the Highway Beautification Act (HBA) and the
Rural Roads Act (RRA)

Form ROW-OA-14
(Rev. 02/2021)
Page 1 of 1

Part 1 - Instructions

Permit applications for new signs and amendment applications for existing signs should include engineering plans/drawings of your sign as an attachment to this form. If you did not employ the use of professional engineering services in the construction of your sign or you are attempting to permit an existing sign for which engineering plans/drawings are unavailable, please attach a sketch or drawing of the sign in its current configuration to this form.

This completed form, along with the required attachment(s) will serve as the certification by you, the applicant, that your structure meets or exceeds the required wind load pressures in 43 TAC § 21.188 and 43 TAC § 21.431.

To submit this certification, upload the completed form along with the applicable attachment(s) at the time of application. If the structure you erect does not correspond to your initial submission, you must upload an updated copy of this form and accompanying documentation to the corresponding record in the Enterprise Permitting Solution(EPS) on or before the 1st year expiration of the new permit or amended permit application. If the certification is not received by that date, the permit will be ineligible for renewal in accordance with 43 TAC § 21.188 and 43 TAC § 21.431.

Part 2 – Identification of Sign

All fields within this section must be completed. If you are applying for a new permit and do not have a Record Number, you may leave that field blank.

Record Number: (If Applying for a new sign, Leave Blank)	
County:	
Highway:	
Latitude, Longitude:	
Location:	
Sign Height:	

Part 3 - Certification

I _____, certify that the commercial sign structure referenced in the above table, meets the minimum standards for wind load established in 43 TAC § 21.188 and 43 TAC § 21.431. I also acknowledge that any false statement by me regarding this certification is cause for cancellation of the associated permit in accordance with 43 TAC § 21.176(a)(6) and 43 TAC § 21.425(a)(6).
